

Free Technician Amateur Radio License Class

A one day class will be held on the **USS Hornet Museum** in Alameda on **July 15th** at 8:30 AM to about 4:00 PM. The **Hornet Amateur Radio Club** and the **Livermore Amateur Radio Klub** are providing the class for free.

Test given after the class. **There is a \$15.00 charge to take the test.**

You will need a government issued photo ID, and will need to put your FRN (FCC Registration Number) or your Social Security number on the application (this applies to everyone, including minors). If you prefer to not use your Social Security Number, you should obtain a FRN from the FCC (www.fcc.gov).

The Class will teach you what you need to know to get your Technician Amateur license. Morse Code is no longer required to get a Ham license.

The notes for the class are available at <http://www.rdf-sf.org> and can be found in: **Library → KN6FW-Tech Class**

Please download all 4 files, ***PRINT*** them, and bring them to class (Reading through them before class would be good as well).

Rich, KN6FW will teach the class and recommends the Gordon West's ***Technician Class Manual*** as a reference. Reading the book ahead of time is highly recommended.

You will need to sign up in advance for the class, and will need to get on the Hornet at 8:00 AM. *Note that this is a National and State Historic Landmark and the class location is accessible only by steep stairs.*

Contact Roger, KJ6WSO at rogerdeming@yahoo.com to sign-up for the class.

Class is limited to 30 students, so sign-up early.
